

# POWERPANEL® CLOUD APP

Power monitoring  
anytime, anywhere

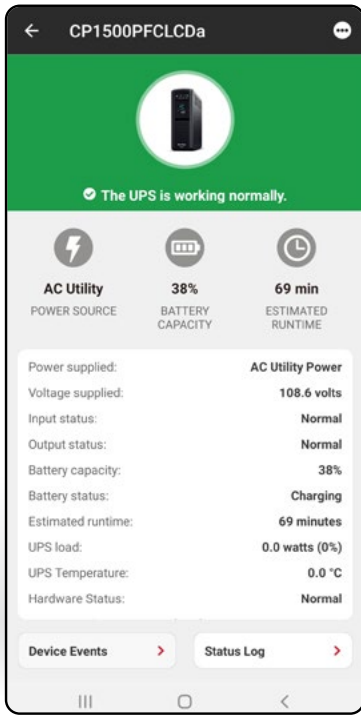

## Easy, intuitive UPS power monitoring

PowerPanel® Cloud makes it easy to monitor CyberPower UPS systems anywhere with an internet connection. Now from a smartphone or mobile device, businesses are able to simplify power monitoring options to gain efficiencies and reduce IT resources.

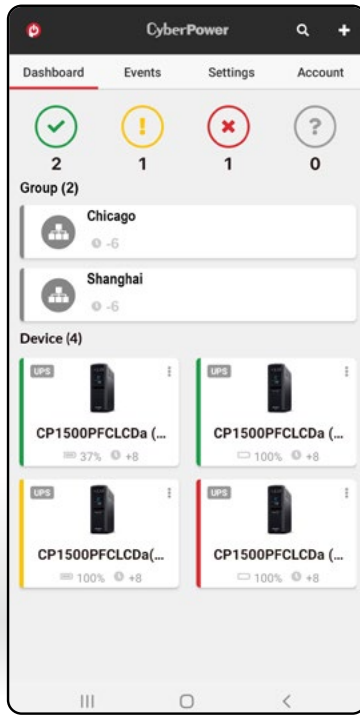

The dashboard provides at-a-glance UPS status, power conditions, and instant problem recognition. Event logs provide key insights for trouble-shooting and prevention of potential power issues. Alert notifications are sent via email or in-app messaging.

It's ideal for decentralized service providers, POS systems with limited network infrastructure, and small/medium businesses looking to simplify power monitoring.

### MOBILE POWER PRODUCTIVITY

An efficient and time-saving UPS remote monitoring app. Simplify power monitoring using your mobile device from anywhere with an internet connection.

### DECENTRALIZED MONITORING

Groups within a company can be monitored separately allowing for monitoring by segment, client, or an individual location.

### INTUITIVE DESIGN

At-a-glance color graphics and indicators provide instant UPS status, network power conditions, and problem recognition.

### SIMPLE SETUP

Just download the app to your phone and create an account. Install the cloud cards into compatible CyberPower UPS systems, follow the instructions to add UPS systems to your account, and begin monitoring.
