

PowerPanel Business v4.4 Release Note

New Features

- Option to import configuration files from PowerPanel Business Edition v3.x to PowerPanel Business v4.4
- Added control for single outlets on managed PDUs, including stop, start, and reboot of PDU outlets in the Management module
- Includes the option, in settings, to select a specific network interface card (IP address), when multiple cards are installed in the same computer or server

Feature Improvements

- Improved multi-account setup and management for super administrator, administrator, user and associated account privileges
- Enhancement to the Remote module to view more device (UPS and managed PDUs) information
- Updated support for communication with Online UPS models
- Additional languages are now available: Czech, Spanish, Croatian
