

## BPL48V75ART2U EBM

The Extended Battery Module offers extended run-times during power outages.

The CyberPower BPL48V75ART2U (48V) Extended Battery Module (EBM) significantly extends run-time during power outages.

It is designed to be similarly mounted in 2U rack or tower configurations. The battery data link transmits the unit's diagnostic vitals to the UPS display for real-time monitoring and a heavy gauge power cord, adapted with plug-n-play DC connectors, permits the battery pack to be easily hot-swapped, ensuring continuous operation of critical systems, during normal UPS maintenance.

A Three-Year Warranty ensures that this UPS has passed our highest quality standards in design, assembly, material and workmanship.
