POWER INVERTER

Convert DC power to AC power for laptops, mobile devices, and electronics

The CyberPower 160 Power Inverter (CPS160PPB2U) converts power from your vehicle's 12V DC power outlet to simultaneously power up to four devices with its two household AC outlets and two USB ports (2.4 Amp shared). Use the AC outlets to power portable electronics while you're traveling. The USB ports charge up to two USB-powered devices at the same time, including most tablets, with 2.4 Amps of power.

Safety features such as a built-in fuse, surge protection, and automatic shutdown protect your connected devices from power surges and your automotive battery from accidental power drain. Other features include sliding outlet covers, a four-foot power cord, a DC plug, and a convenient seat pocket hook. The CyberPower 160, backed by a two-year limited warranty, is ideal for mobile devices, entertainment electronics, digital cameras, and other accessories that use up to 160 watts of power.
