

RELAYIO600 Local Management Card

Offers users a solution for UPS status monitoring and local device control

The CyberPower RELAYIO600 is a local management solution that provides users the ability to monitor UPS status and events via 5 contact closure outputs. Easy to install in any Smart App Online Series UPS system.

Input contact closure allows the UPS to be shutdown remotely while on Battery Mode to preserve battery power in the event of a prolonged power outage.

A Three-Year Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material and workmanship.

Features

- Relay I/O Card for UPS status monitoring
- 5 relay output contact closures indicating UPS status information
- 1 relay input contact closure to shutdown UPS on Battery Mode
- Connections via DB9 port or Internal Terminal Block
- Hot-swappable (Plug-n-Play)
