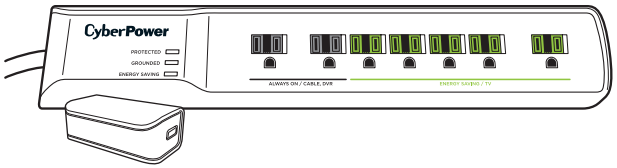
CyberPower®

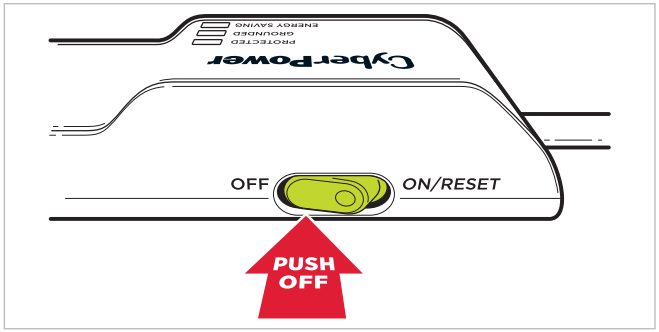
HT705GR Tier 2 APS

QUICK START GUIDE

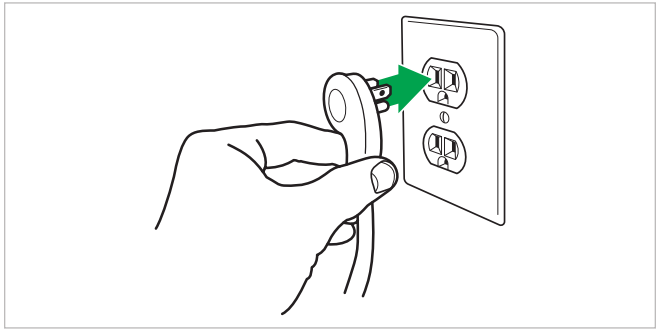


SETUP:

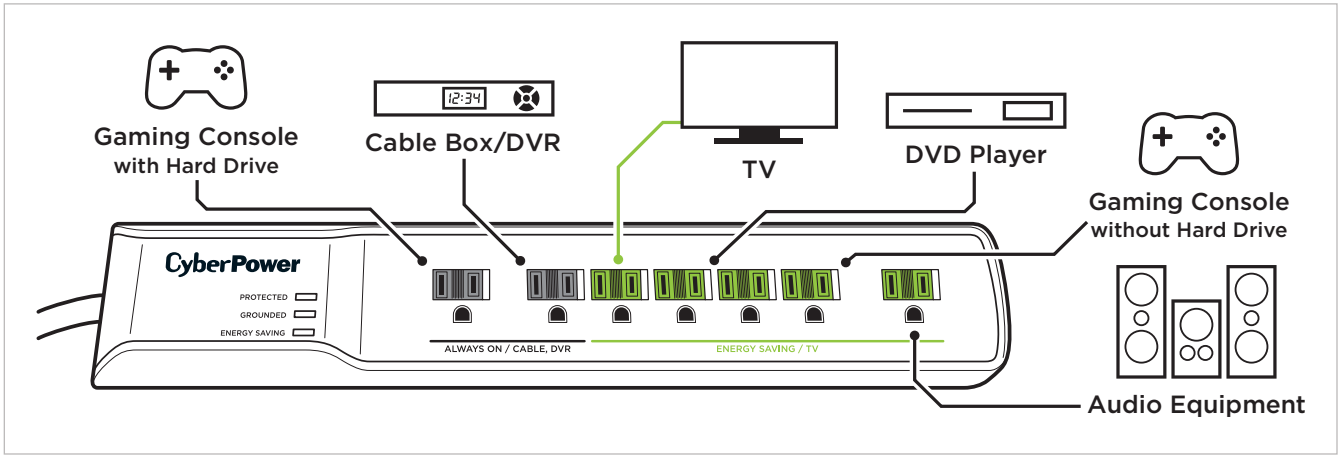
1. Turn power switch to **OFF.**



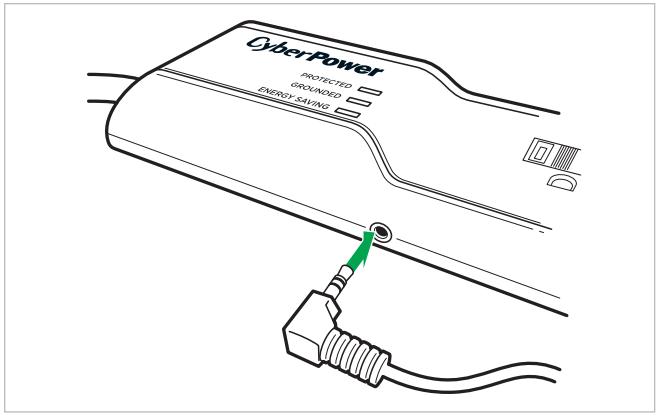
2. Plug surge protector into wall.



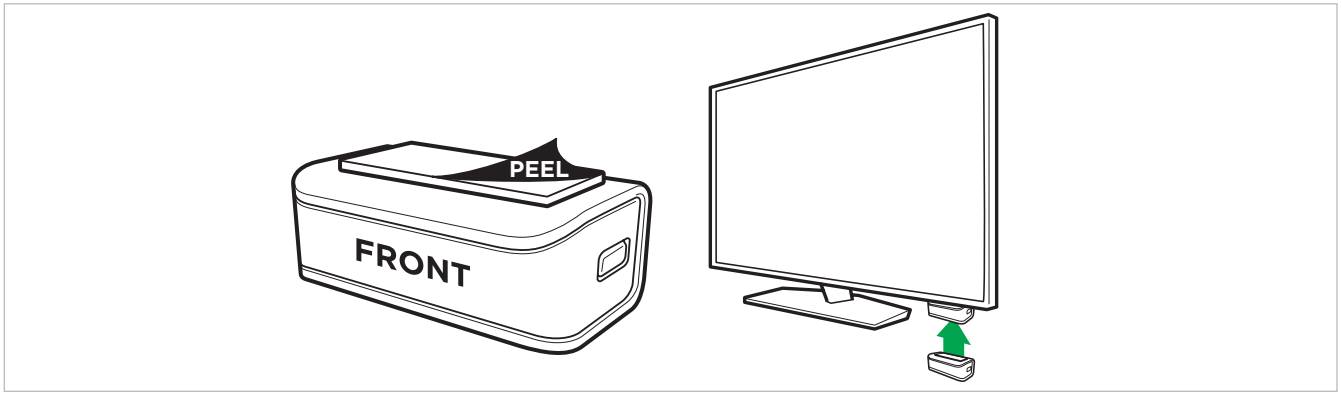
3. Plug powered-down electronic devices in to appropriate outlets.



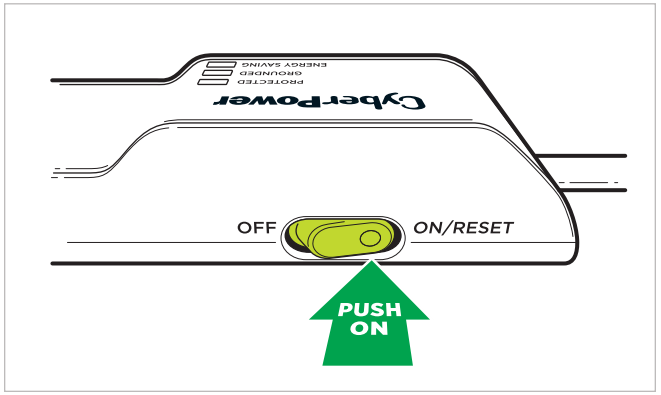
4. Connect infra-red (IR) sensor to surge protector with small input jack.



5. Place glossy side of IR sensor in sightline of remotes.

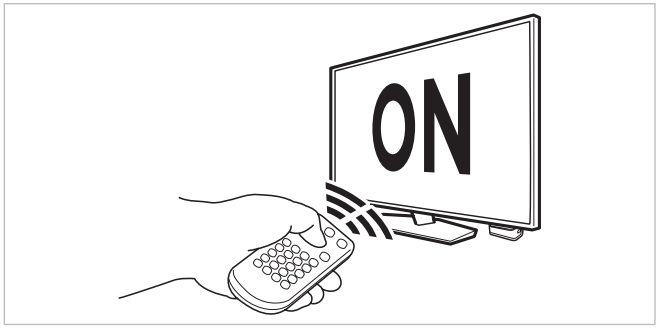


6. Turn power switch to **ON.**

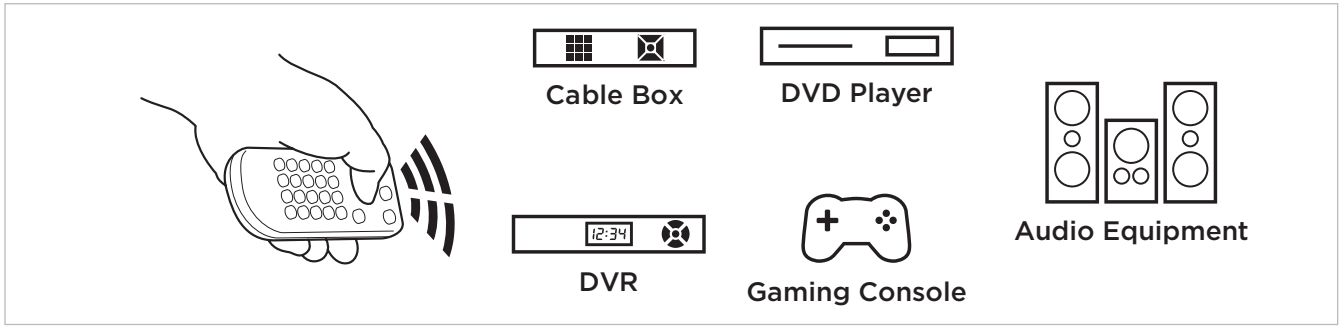


OPERATION:

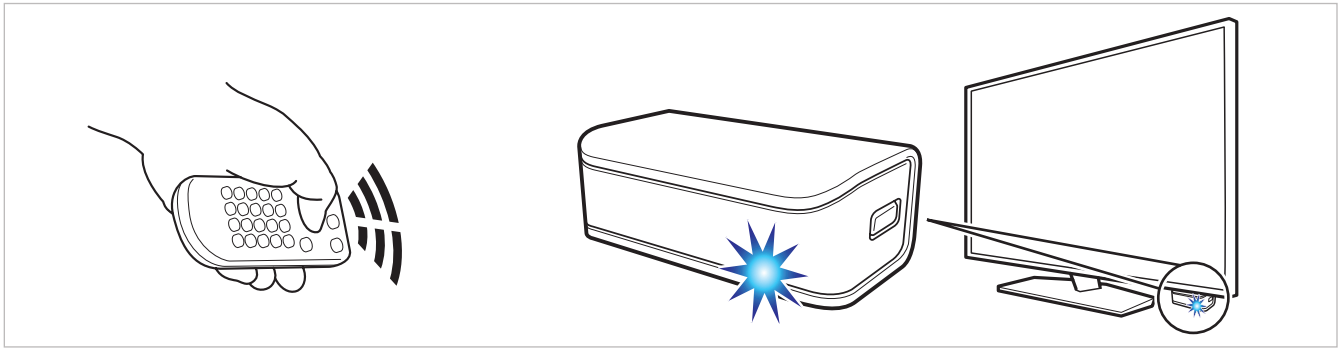
1. Power TV **ON.**



2. Power **ON** DVD player, game console, speakers, etc.



3. Energy saving timer's default setting is 1 hour. The IR sensor's blue LED light will blink for 4.5 minutes after one hour of last click of remote. Click any button on a TV remote or the volume button on a cable provider's remote to restart energy saving timer to zero. Blue LED light will stop blinking for another hour.



4. Power **OFF** when done watching.

NOTE: IR sensor blinks for 1 minute after TV powers off. Power strip will turn off energy saving outlets.

CHANGING ENERGY SAVING TIMER

One Hour:

1. Hold the IR sensor button down for 7 seconds.
2. LED light will flash 3 times, release.
3. Press IR sensor 1 time.
4. LED light will flash 1 time, and timer will be 1 hour.

Two Hours:

1. Hold the IR sensor button down for 7 seconds.
2. LED light will flash 3 times, release.
3. Press IR sensor 2 times, pausing in between.
4. LED light will flash 2 times, and timer will be 2 hours.
