

LCD PDU Firmware v1.2.0 Release Note

INTELLIGNET FIRMWARE RELEASE NOTES

Applicable Products:

PDU31XXX, PDU41XXX, PDU71XXX, PDU81XXX

Version 1.2.0 (Release Date: April 24, 2020)

New Features

- Adds support for TLS v1.2
- Now supports AutoPing

Feature Improvements

- Improved security feature that requires users to update the username/password after the initial login with the default values.
- Improved support for Gmail notifications.
- Added X-Frame options to the http header for enhanced security.
- Improve the function for “Admin/ Viewer Manager IP” to be on the [System->Management] webpage to support Radius/LDAP.

Fixes

- Repaired the issue with the login SSH console via Putty version 0.71 or above.
- Fixes an issue with “The Dude” application when it detects and scans the RMCARD with SSH enabled.
- Repairs a login issue that kept redirecting to the login page after the process was completed on the web.
