

## PowerPanel Business v4.7 Release Note

### New Feature

- Local, Remote, and Management Modules now include an “Add Software Update” option

### Feature Improvements

- Updated security patch for Virtual Appliance in the Local and Remote modules
- Management Dashboard
  - Provides an option to search devices by status or device name
  - Adds device location as an option
- PowerPanel Cloud Support
  - Adds the ability to connect to the PowerPanel Cloud using the Local Module (the purchase of a license is required)
- Added new language options
  - French
  - Polish
  - Traditional Chinese
  - Simplified Chinese
- Advanced Command Script
  - Option to write a command to execute a status on the log file
  - Can be set as a default script
- PowerPanel Business Management Updates
  - Adds the ability to manually input a device IP address in the device settings
  - Installations up to 30 nodes with no action required
  - For installations over 30 nodes contact your US CyberPower Systems sale representative or CyberPower’s US Technical Support to add more nodes
- Nutanix and VMware
  - Updated to add Nutanix support including Nutanix AHV graceful shut down to both Remote and Local modules
  - Adds support for VMware ESXI 7.0 to both Remote and Local modules
- License Agreement
  - The Installer and User’s manual includes an updated License Agreement

### Fixes

- Local, Remote, and Management
  - Resolves an issue receiving Clickatell SMS messages
- Local
  - Fixes an API related problem that causes a software disconnection issue in macOS 10.15 & 11.X

- Remote
  - Addresses an issue of not showing power failure events when connected to primarily the OLS series and with some other new models of UPS
- Management
  - Resolves a communication problem with the RMCARD205 when connected to the latest revision of the Smart App Sinewave UPS series, as well as some other UPS models that have encountered the issue.
