SAVE THESE INSTRUCTIONS
Please read this manual and follow the instructions for installation and operation.
SAFETY INSTRUCTIONS

PRODUCT SAFETY

RISK OF ELECTRIC SHOCK

See Installation Instructions Before Connecting To The Supply.
Do Not Disconnect Battery Connector Under Load.
Batteries replaceable by SERVICE PERSONNEL.

BATTERY

Do not dispose of batteries in fire as the battery may explode.
Do not open or mutilate the battery, released electrolyte is harmful to the skin and eyes.

INTRODUCTION

UPS EXTENDED BATTERY MODULES
Extended Battery Modules (EBMs) from CyberPower (BP144VL2U01) increase battery runtimes during power outages. Each rack/tower convertible EBM uses 2U of rack space and can be installed in a tower form factor to match the UPS installation. The DC plug-and-play power connectors allow to daisy-chain additional EBMs to a UPS system. EBMs compatible with Smart App Online UPS systems also have a built-in battery charger, providing Fast Charge Technology to quickly restore the backup power supply. Every CyberPower EBM has a three-year warranty.

UNPACKING PROCEDURES

Information, advice, help

The Extended Battery Module is very heavy, please handle with care. Wear safety shoes and use a hydraulic equipment lift if one is available. At least two people are required for all handling operations, including unpacking, lifting, and installation in a rack system. Do not use the lifting straps to carry the unit around; they are provided to manually unpack the unit only.

USE LIFTING STRAPS TO REMOVE THE UNIT FROM THE BOX.

1. **EBM DC Output Cable**
Use this output cable to connect the EBM to a UPS or to the next EBM.

2. **EBM DC Input Connector**
Use this input connector to daisy chain the next EBM. Remove the connector cover for access.

3. **BM Port**
Connection port for built-in battery management module on UPS and Extended Battery Module.

4. **On-board Replaceable Fuse Cover**
Replaceable fuse is accessible from the rear panel. Serviceable only by qualified personnel.

5. **DC Breaker**
Use the DC breaker to disconnect battery output.

6. **AC Fast Charge Input (IEC320 C14)**
Connect to a 208V, 30A, AC power source, or connect to the AC Fast Charge output from an upstream EBM.

7. **AC Fast Charge outlet (IEC320 C13)**
Use this outlet to connect to the Fast Charge AC input of a downstream EBM.

8. **AC Circuit Breaker**
Provides overload and fault protection.
CONNECTION WITH UPS

Scenario #1: UPS with one Extended Battery Module (EBM)

**Step 1:** Turn off the DC breaker on the EBM.

**Step 2:** Loosen the two screws to remove the battery cable retention bracket of the UPS.

**Step 3:** Use the output cable of the EBM to connect the EBM to the UPS.

**Step 4:** Rotate the battery cable retention bracket and tighten the two screws to fix battery cable.

**Step 5:** Connect the BM/ENV port from UPS rear panel to BM port marked “IN” on the rear panel of the Extended Battery Module using the provided BM cable. Refer to illustration below.

**Step 6:** Use a NEMA L6-30P to IEC-320-C13 power cord to plug AC input inlet of the battery module into a wall receptacle.

**Step 7:** Turn on the DC breaker of the EBM.
EXTENDED BATTERY MODULE INSTALLATION CONT.

CONNECTION WITH UPS CONT.
Scenario #2: UPS with multiple Extended Battery Modules (EBMs)

Step 1: Turn off the DC breaker on the EBM.

Step 2: Loosen the two screws to remove the battery cable retention bracket of the UPS.

Step 3: Use the output cable of the EBM to connect the EBM to the UPS.

Step 4: Rotate the battery cable retention bracket and tighten the two screws to fix battery cable.

Step 5: Connect the BM/ENV port from UPS rear panel to BM port marked “IN” on the rear panel of the Extended Battery Module using the provided BM cable, and then connect another BM cable between BM port marked “OUT” and BM port marked “IN” of another Extended Battery Module. Refer to illustration below.

Step 6: Use a NEMA L6-30P to IEC-320-C13 power cord to plug AC input inlet of the battery module into a wall receptacle.

Step 7: Turn on the DC breaker of the EBM.
EXTENDED BATTERY MODULE INSTALLATION CONT.

CONNECTION WITH UPS CONT.

Step 7: Turn on the DC breaker of the 2nd EBM.

Step 8: Set the EBM number to the respective setting to match the number of installed units. To do this via the LCD control panel, go to the Configuration Menu, then scroll to the EBM Number setting, select the appropriate number and Save the configuration. This operation can also be done via the RMCARD web UI or via PowerPanel® Business Edition Agent software. Please see their respective User Manual for instructions.

EXTENDED BATTERY MODULE CONFIGURATION

Extended Battery Modules can be configured by the user to display correct estimated battery runtimes.

1. Select “Main Menu” and press the “ENTER” button to activate the “Main Menu”.

2. Press the “UP” and “DOWN” buttons to select the “SET UP” ICON.

3. Press the “ENTER” button to enter the “SET UP” function.

4. Press the “UP” and “DOWN” buttons to scroll to the “External Batt” option.

5. Press the “ENTER” button to enter the “External Batt” option.

6. Press the “UP” and “DOWN” buttons to select the “Auto” or “Manual” option.

7. (a) Select “Auto” and press the “ENTER” buttons to activate the Auto detect function.
   (b) Select “Manual” and press the “UP” and “Down” buttons to select the number of EBM installed then press the “ENTER” button to set.

8. You may be prompted “Save Change?” to save the selection, if so press the “ENTER” button to save the setting.

9. Press the “ESC” button to cancel or return to the previous SET UP menu.

HARDWARE INSTALLATION

CyberPower UPS systems can be installed in a rackmount or vertical/tower orientation. This versatility is especially important to growing organizations with changing needs that value having the option to position a UPS on the floor or in a rackmount system. Note that the included rack mounting hardware is only compatible with square hole racks. Please follow the instructions below for the respective mounting methods.

RACKMOUNT INSTALLATION

Caution: Important Instructions

To prevent the risk of fire or electric shock, only use the supplied hardware to attach the mounting brackets.

Step 1: Remove the dust covers
Remove ten dust covers from the screw holes as shown below.

Step 2: Rackmount ear & hanging bracket installation
Attach two rackmount ears to the UPS using eight black M5X7L flat head screws and tighten two hanging brackets using six silver M5X6L pan head screws.

Step 3: Rackmount rail Installation
The mounting depth of the included rackmount rails can adjust from 20.5 in to 36 in (52 cm to 91.5 cm). Select the proper holes in the rack for positioning the UPS in the rack. The UPS takes up 2 rack units: rack hole positions 1 through 6.

Position the guide screws on the back of the rackmount rails into the rear rack square holes to temporarily support the rails in place.

Step 4: Adjust rackmount rails to fit your rack
Adjust the rail depth to match your rack depth. Attach each rackmount rail to your rack with two black M5X12L pan head screws and two plastic washers at the front of the rack (square holes 1 and 4 as shown below). Secure each rail to the rear of the rack with two black M5X12L pan head screws and two plastic washers.
RACKMOUNT INSTALLATION CONT.

Step 5: Place and secure the UPS on the rails
Slide the hanging brackets on the UPS on to the rails mounted in the rack with the front of the unit facing toward you. Secure the UPS to your rack with four black M5X12L pan head screws at the front of the rack (square holes 2 and 5 as shown above).

NOTE: To slide the UPS out from the rack
The UPS will be secured by a safety locking mechanism midway of pulling it out of the rack. Use both hands to hold the UPS and press the safety locking tab to pull the UPS out.
VERTICAL/TOWER INSTALLATION

Step 1: Adhere rubber pads
Adhere four circular rubber pads to the left hand side of the extended battery module. This will become the bottom side.

Step 2: Attach the base stands and attach the dust covers
Stand the extended battery module on its side with the rubber pads facing down. Install dust covers on open screw holes. If installing the extended battery module together with a UPS and Extended Battery Module (EBM) secure the tie plate between the UPS and the extended battery module using four silver M5X6L pan head screws. Adhere four circular rubber pads to each rack mount ear to use as tower stands and screw on to the extended battery module and UPS using four silver M5X6L pan head screws for added stability as shown below.
Storage
To store your UPS for an extended period of time, cover and store it with the battery fully charged. Recharge the battery every three months to ensure battery life.

Battery Replacement
Please read and follow the Safety Instructions before servicing the battery. Battery replacement should be performed by trained personnel who are familiar with the procedures and safety precautions. Make a note of the Replacement Battery part number.

Safety Precautions

⚠️ **Warning**: High voltage – Risk of Electric Shock

Only use replacement batteries that are certified by Cyber Power Systems. Use of incorrect battery type is an electrical hazard that could lead to explosion, fire, electric shock, or short circuit.

Batteries contain an electrical charge that can cause severe burns. Before servicing batteries, please remove any conductive materials such as jewelry, chains, wrist watches, and rings.

Do not open or mutilate the batteries. Electrolyte fluid is harmful to the skin/eyes and may be toxic.

To avoid electric shock, turn off and unplug the UPS from the wall receptacle before servicing the battery.

Only use tools with insulated handles. Do not lay tools or metal parts on top of the UPS or battery terminals.

Replacement Batteries
Please refer to the front side of the EBM for the model number of the correct replacement batteries. For battery procurement, go to www.CyberPowerSystems.com, or contact your local dealer.

When the UPS LCD displays Service Battery, use PowerPanel® Business Edition Agent software or log on to the RMCARD to perform a runtime calibration to verify battery capacity is sufficient and acceptable.
Battery Disposal

Batteries are considered hazardous waste and must be disposed of properly. Contact your local government for more information about proper disposal and recycling of batteries. Do not dispose of batteries in fire.

Cyber Power Systems encourages environmentally sound methods for disposal and recycling of its UPS products.

Please dispose and/or recycle your UPS and batteries in accordance with local regulations.

BATTERY REPLACEMENT CONT.

Step 1: Remove the front panel.

Step 2: Unscrew and open the battery access door.

Step 3: Disconnect the battery and battery management module connector.
BATTERY REPLACEMENT CONT.

Step 4: Unscrew the battery retention bracket and then open it.

Step 5: Pull the battery trays out slowly and then put the new battery trays into the compartment.

Step 6: Assemble battery retention cover and tighten the thumbscrew.

Step 7: Install the front panels. Execute a battery test via the LCD control panel. To do this go to the Configuration Menu, then scroll to the UPS Diagnostic option, then select Battery Test and Activate, then scroll to Reset ReplaceBAT to reset the battery replacement date. This operation can also be done via PowerPanel® Business Edition Agent or the RMCARD web interface. Please see their respective User Manuals for detailed instructions.

Read the following terms and conditions carefully before using the CyberPower BP144VL2U01. By using the Product you consent to be bound by and become a party to the terms and conditions of this Limited Warranty (together referred to as the “Warranty”). If you do not agree to the terms and conditions of this Warranty, you should return the Product for a full refund prior to using it.

**Who is Providing this Warranty?**
CyberPower Systems (USA), Inc. (“CyberPower”) provides this Limited Warranty.

**What Does This Warranty Cover?**
This warranty covers defects in materials and workmanship in the Product under normal use and conditions.

**What is the Period of Coverage?**
This warranty covers the Product for three years.

**Who Is Covered?**
This warranty only covers the original purchaser. Coverage ends if you sell or otherwise transfer the Product.

**How Do You Get Warranty Service?**
1. Before contacting CyberPower, identify Your Product model number, and the Purchase Date.
2. Email us at tech@cpsww.com or Call us at (877) 297-6937.
3. If your product requires warranty service you must provide a copy of your dated purchase receipt or invoice.
How Do You Open A Warranty Claim?

1. Call us at (877) 297-6937 or write to us at Cyber Power Systems (USA), Inc., 4241 12th Ave. E., STE 400, Shakopee, MN 55379, or send us an e-mail message to claims@cpsww.com for instructions, within 10 days of the occurrence.

2. When you contact CyberPower, identify the Product, the Purchase Date, and Request a Claim Number.

3. You must provide a dated purchase receipt (or other proof of the original purchase) for the Cyber Power unit.

4. Pack and ship the product to CyberPower and all claim forms that CyberPower provides to you. Show the Claim Number on the shipping label or include it with the product. You must prepay all shipping costs, you are responsible for packaging and shipment, and you must pay the cost of the repair estimate.

How Long Do I Have To Make A Claim?
All claims must be made within ten days of the occurrence.

What Will We Do To Correct Problems?
CyberPower will inspect and examine the Product.

If the Product is defective in material or workmanship, CyberPower will repair or replace it at CyberPower's expense, or, if CyberPower is unable to or decides not to repair or replace the Product (if defective) within a reasonable time, CyberPower will refund to you the full purchase price you paid for the Product (purchase receipt showing price paid is required).

Who Pays For Shipping?
We pay when we send items to you; you pay when you send items to us.
1. This Warranty does not cover any software that was damaged or needs to be replaced due to the failure of the Product or any data that is lost as a result of the failure or the restoration of data or records, or the reinstallation of software.

2. This Warranty does not cover or apply to: misuse, modification, operation or storage outside environmental limits of the Product or the equipment connected to it, nor for damage while in transit or in storage, nor if there has been improper operation or maintenance, or use with items not designed or intended for use with the Product, such as laser printers, appliances, aquariums, medical or life support devices, etc.

What Other Limitations Apply?
The sole and exclusive remedies of the Initial Customer are those provided by this Warranty.

1. This Warranty does not apply unless the Product and the equipment that was connected to it were connected to properly wired and grounded outlets (including compliance with electrical and safety codes of the most current electrical code), without the use of any adapters or other connectors.

2. The Product must have been plugged directly into the power source and the equipment connected to the Product must be directly connected to the Product and not “daisy-chained” together in serial fashion with any extension cords, another Product or device similar to the Product, surge suppressor, or power tap. Any such installation voids the Limited Warranty.

3. The Product must have been used properly in a suitable and proper environment and in conformance with any license, instruction manual, or warnings provided with the Product and the equipment connected to it.

4. The Product must have been used at all times within the limitations on the Product’s VA capacity.

The Product was designed to eliminate disrupting and damaging effects of momentary (less than 1ms) voltage spikes or impulses from lightning or other power transients. If it can be shown that a voltage spike lasting longer than 1ms has occurred, the occurrence will be deemed outside the rated capabilities of the Product and the Limited Warranty is void. CyberPower Does Not Cover or Undertake Any Liability in Any Event for Any of the Following:

1. Loss of or damage to data, records, or software or the restoration of data or records, or the reinstallation of software.
LIMITED WARRANTY CONT.

What Other Limitations Apply? Cont.

2. Damage from causes other than AC Power Line Transients, spikes, or surges on properly installed, grounded and code-compliant 120 volt power lines in the United States and Canada; transients, surges or spikes on standard telephone land lines, PBX telephone equipment lines or Base 10T Ethernet lines, when properly installed and connected. (This exclusion applies, for example, to fluctuations in data transmission or reception, by CATV or RF transmission or fluctuations, or by transients in such transmission.)

3. Damage from any circumstance described as excluded above with respect to the Product.

4. Damages from fire, flood, wind, rain, rising water, leakage or breakage of plumbing, abuse, misuse or alteration of the product.

5. CyberPower excludes any liability for personal injury under the Limited Warranty. CyberPower excludes any liability for direct, indirect, special, incidental or consequential damages, whether for damage to or loss of property [EXCEPT FOR (AND ONLY FOR) the specific limited agreement of CyberPower to provide certain warranty benefits, loss of profits, business interruption, or loss of information or data. NOTE: Some States or Provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

6. The Product is not for use in high-risk activities or with aquariums. The Product is not designed or intended for use in hazardous environments requiring fail-safe performance, or for use in any circumstance in which the failure of the Product could lead directly to death, personal injury, or severe physical or property damage, or that would affect operation or safety of any medical or life support device (collectively, "High Risk Activities"). CyberPower expressly disclaims any express or implied warranty of fitness for High Risk Activities or with aquariums. CyberPower does not authorize use of any Product in any High Risk Activities or with Aquariums. ANY SUCH USE IS IMPROPER AND IS A MISUSE OF THE PRODUCT.

Where Can I Get More Information?

CyberPower is the warrantor under this Limited Warranty.

For further information please feel free to contact CyberPower at

CONFORMANCE APPROVAL

FCC NOTICE
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference that may cause undesired operation.

WARNING!! This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. Shielded signal cables must be used with this product to ensure compliance with the Class A FCC limits.

The Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulation.

Cet appareil numerique de la class A respecte toutes les exigencies du Reglement sur le materiel brouilleur du Canada.

This document is believed to be accurate, but CyberPower reserves the right to change or correct the contents and does not assume any responsibility for omissions or errors.
