These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receivers.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Compliance Statement
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION!
To prevent the risk of fire or electric shock, connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

Battery Replacement

BATTERY REPLACEMENT PROCEDURE:
1. Turn off and unplugging all connected equipment.
2. Turn the UPS off and unplug it from the AC power source.
3. Remove the front panel retaining screws and lift the front panel off.
4. Remove the front panel retaining screws and lift the front panel off.
5. Disconnect the batteries from the UPS.
6. Disconnect the battery cables from the UPS.
7. Replace the batteries in the UPS with new ones.
8. Reconnect the battery cables to the UPS.
9. Reconnect the front panel to the UPS.
10. Turn on the UPS and reconnect all connected equipment.

CAUTION!
- Do not replace batteries with an incorrect type. Damage to the UPS may result.
- Do not mix old and new batteries.
- Do not open or recharge the batteries.
- Do not attempt to service the batteries.

REMEMBER:
- Batteries are considered HAZARDOUS WASTE and must be disposed of properly. Most retailers will take old batteries collected used batteries for recycling, as required by local regulations.

DEFINITIONS FOR ILLUMINATED LCD INDICATORS

1. ONLINE: The UPS is supplying utility power to connected equipment.
2. Battery: The UPS is in Battery mode or when the utility power is not available.
3. LOW BATTERY: The UPS is low on battery power.
4. FAULT: The UPS is in a fault condition.
5. OVERLOAD: The UPS is overloaded.
6.嚴重: The UPS is in a serious condition.

BATTERY CAPACITY:
This meter displays the approximate charge level (% of the UPS's internal battery). During a blackout or severe Brower, the UPS switches to battery power, the ON BATTERY icon appears, and the charge level decreases.

6. Replace battery: This icon illuminated when the batteries are not connected or the battery was worn out.
Advanced Energy-Saving Design: The GreenPower UPS™ has a high-efficiency charge which makes it the most energy-efficient UPS in its class. The advanced high-frequency charging system significantly improves charging efficiency and conserves energy. As a result of the advanced charger, the GreenPower UPS™ uses less energy compared to competitive models. The GreenPower UPS™ is manufactured in accordance with the Restriction on Hazardous Substances (RoHS) directive making it one of the most environmentally-friendly UPS on the market today.

Limited Warranty and Connected Equipment Guarantee

CyberPower reserves the right to change or modify the warranty without notice. To receive warranty service, please contact CyberPower Support for a Return Material Authorization (RMA) number.

Who is Providing this Warranty? Cyber Power Systems (USA), Inc. (“CyberPower”) provides this Limited Warranty.

What Does This Warranty Cover? This Warranty covers defects in materials and workmanship in the CPS Product under normal use and normal conditions. It also covers equipment that was conected to the CPS Product and damaged because of the failure of the CPS Product.

What is the Period of Coverage? The warranty covers the CPS Product for three years from the date of purchase and connected equipment for as long as the user own the CPS Product.

Who is Covered? This warranty only covers the original purchaser. Coverage ends if you sell or otherwise transfer the CPS Product.

How Do You Get Warranty Service? 1. Before contacting CyberPower, identify your CPS Product model number, the purchase date, and each item of Connected Equipment (e.g. computer, tower, computer monitor, inverter, printer, cable modem, etc.). 2. Visit our web site at cyberpower.com/support or call us at 877-927-6837. 3. If your CPS product requires warranty service you must provide a copy of your purchase receipt or invoice. 4. Follow the steps to contact CyberPower and request the warranty service.

How To Open a Connected Equipment Claim: Each CPS Product (if defective) and its connected equipment, a repair cost estimate for the damaged to the Connected Equipment, and all claim forms that CyberPower provides to you. Show the Claim Number on the shipping label or include it with the product.

Who Pays For Shipping? We pay when we send items to you; you pay when you send items to us.

Is there any coverage for the CPS Product? 1. This Warranty covers any device that was damaged because of the failure of the CPS Product or any of the following:
   a) Damage resulting from power outages, surges, or spikes.
   b) Damage resulting from power interruptions, brownouts, or blackouts.
   c) Damage resulting from power company blackouts or brownouts.
   d) Damage resulting from the use of electrical devices exceeding the rated capacity of the CPS Product.

What Will We Do To Correct Problems? CyberPower will inspect and examine the CPS Product. CyberPower will advise you in writing of any defects found and what action will be taken to correct the problem.

How Long Do I Have To Make A Claim? If it appears the CPS Product failed to protect any equipment plugged into it, we will also send you forms for making your claim for the connected equipment. We will repair or replace the equipment that was damaged because of the failure of our CPS Product or any of the following:
   a) Bast damage to the Connected Equipment, and the fair market value (NOT REPLACEMENT COST) of the equipment at the time of the damage. We will assess Blue Book, or another third-party valuation guide, or eBay, Craigslist, or other source to establish that amount. Our maximum liability is limited to $45,000 for the CPS Product and $50,000 for CPS/BF CCD.

Who is Providing this Warranty? Cyber Power Systems (USA), Inc. (“CyberPower”) provides this Limited Warranty.

What Will We Do To Correct Problems? CyberPower will inspect and examine the CPS Product.
