**UNPACKING**

Inspect the UPS unit receipt. The box should contain the following:

- (a) UPS unit (b) User’s manual (c) PowerPanel® Personal Edition software CD
- (d) USB device cable (e) Telephone cable (f) Warranty registration card

**HOW TO DETERMINE THE POWER REQUIREMENTS OF YOUR EQUIPMENT**

1. Ensure that the equipment plugged into the outlet does not exceed the UPS unit’s rated capacity (750VA/420W for CP750LCD/CP750LCDM). If the rated capacities of the unit are exceeded, an overload condition may occur and the circuit breaker will trip.

2. There are many factors that can affect the amount of power that your computer system will require. For optimal system performance keep the load below 80% of the unit’s rated capacity.

**HARDWARE INSTALLATION GUIDE**

1. This new UPS may look identical to your old model. However, after receiving a new UPS, to ensure the battery’s maximum charge capacity, it is recommended that you charge the battery for at least 8 hours. Your UPS is equipped with an auto charge feature. When the UPS is plugged into an AC outlet, the battery will automatically charge when it’s turned on or turned off.

2. With the UPS unit turned off and unplugged, connect your computer, monitor, and any other peripheral requiring battery backup from the SURGE/BATTERY outlets. Plug the other peripheral equipment (e.g., printer, scanner, speakers, etc.) into the full-time surge protection outlets. DO NOT plug a laser printer, paper shredder, copier, space heater, vacuum, sump pump, or other electrical devices into the “Battery and Surge Protected Outlets”. The power demands of these devices will overload and possibly damage the unit.

3. To protect a fax, phone, or modem, connect a telephone cable from the wall jack outlet to the RJ 11 jack of the UPS. Connect a telephone cable from one of the UPS OUT jacks to the modem port on the computer.

4. Plug the UPS into a 3-prong outlet. If your wall outlet is protected by a fuse or circuit breaker, do not service equipment with large electrical demands (e.g., air conditioner, refrigerator, copier, etc.), the warranty warranty voids the use of extension cords, outlet strips, and surge protectors.

5. Press the power switch to turn on the unit. The Power On indicator light will illuminate green and the unit will beep twice. If an overload is detected, an audible alarm will sound and the unit will remain in sleep mode. Be sure to contact your UPS dealer for service.

6. To turn off the UPS, press the off button of the UPS. The circuit breaker is depressed and the UPS is off and the alarm stops.

7. To save the cost of extending power, connect the UPS at an outlet near a battery charging site.

8. To store the UPS for an extended period, cover it and store with the battery fully charged. In storage, replace the battery every three months to ensure optimal battery life.

9. Insure the wall outlet and UPS are located near the equipment being attached for proper accessibility.

**DESCRIPTION**

- **Battery and Surge Protected Outlets**: The unit has two battery power-protection surge outlets to ensure temporary unattended operation of your equipment during a power failure. DO NOT plug a laser printer, paper shredder, copier, space heater, vacuum, sump pump, or other electrical devices into the “Battery and Surge Protected Outlets.” The power demands of these devices will overload and possibly damage the unit.

- **Full-Time Surge Protection Outlets**: The unit has four surge protection outlets.

- **Power Switch**: Press the power button to turn on the UPS or off.

- **Power On Indicator (green)**: This LED is illuminated when the utility power is normal and the UPS outlets are providing power, free of surges and spikes.

- **Electrical Wiring Fault Indicator (red)**: This LED indicator will illuminate to warn the user that the wiring problem exists, such as fault ground, grounding reversed or ground winding. If this LED is illuminated, disconnect all electrical equipment from the outlet and have an electrician verify the outlet is properly wired. The unit will not provide surge protection without being plugged into a grounded and properly wired wall outlet.

- **Communication Protection Ports**: Communication protection ports will protect any standard modem, fax, or telephone line. (RJ11)

- **Circuit Breaker**: Located on the side of the UPS, the circuit breaker serves to provide overload and fault protection.

- **USB Port to PC**: The USB port allows connection and communication between the USB port on the computer and the UPS unit. Do not use this port to control the UPS unit. The USB interface is also compatible with the Power Management applications provided by Windows 7, Vista, Mac OS X, and Linux.

- **Outlets Designed for AC Adaptation**: The UPS unit has four widely-spaced outlets, so AC power adapters can be plugged into the UPS without overlapping adjacent outlets.

**INSTALLING YOUR UPS SYSTEM**

**BATTERY**

- **Battery is worn out**: Contact CyberPower Systems about replacement batteries.

- **Battery not fully charged**: Recharge the battery by leaving the UPS plugged in.

**Power**

- **Power switch has tripped due to an overload**: Turn the UPS off and replace the circuit breaker. If the overload condition persists, replace the circuit breaker with a higher rating and then turn the UPS on.

**UPS does not power up**: Battery is loose. Contact CyberPower Systems about replacement batteries.

**Troubleshooting**

CyberPower Systems (USA), Inc. ("CyberPower") provides this Limited Warranty.

Who is Providing this Warranty?

The Product you consent to be bound by and become a party to the terms and conditions of this Limited Warranty and Connected Equipment Guarantee (together referred to as this "Warranty"). If you do not agree to the terms and conditions of this Warranty, you should return the Product for a full refund prior to using it.

What Does This Warranty Cover?

This warranty covers defects in materials and workmanship in the Product under normal use and conditions. It also covers equipment that was connected to the Product and damaged because of the failure of the Product.

What is the Period of Coverage?

This warranty covers the Product for three years and connected equipment for as long as you own the Product.

Who Is Covered?

This warranty only covers the original purchaser. Coverage ends if you sell or otherwise transfer the Product.

How Do You Get Service?

1. Call us at (877) 297-6937 or write to us at Cyber Power Systems (USA), Inc., 4241 12th Ave. E., STE 400, Shakopee, MN 55379; or send us an e-mail message at claims@cpsww.com for a return authorization, within 10 days of the occurrence.
2. When you contact CyberPower, identify the Product, the Purchase Date, and the item(s) of Connected Equipment. Have information on all applicable insurance or other resources of recovery of that are available to the Initial Customer and Request a Claim Number.
3. You must provide a dated Proof-of-Purchase receipt (or proof of the original purchase) and provide a description of the defect.

How Do You Open A Connected Equipment Claim?

1. Call us at (877) 297-6937 or write to us at Cyber Power Systems (USA), Inc., 4241 12th Ave. E., STE 400, Shakopee, MN 55379; or send us an e-mail message at claims@cpsww.com for instructions, within 10 days of the occurrence.
2. When you contact CyberPower, identify the Product, the Purchase Date, and the item(s) of Connected Equipment. Have information on all applicable insurance or other resources of recovery of that are available to the Initial Customer and Request a Claim Number.
3. You must provide a dated purchase receipt (or proof of the original purchase) and provide a description of the damage to your connected equipment.
4. Pack and ship the product to CyberPower and, if requested, the item(s) of Connected Equipment, a repair cost estimate for the damage to the Connected Equipment, and all claim forms that CyberPower provides you. Show the Claim Number on the shipping label or include it with the product. You must prepay all shipping costs, you are responsible for packaging and shipment, and you must pay the cost of the repair estimate.

How Long Do I Have To Make A Claim?

All claims must be made within ten days of the occurrence.

What Will We Do To Correct Problems?

CyberPower will inspect and examine the Product.

If the Product is defective in material or workmanship, CyberPower will repair or replace it at CyberPower's expense, or, if CyberPower is unable to or decides not to repair or replace the Product (if defective) within a reasonable time, CyberPower will refund to you the full purchase price you paid for the Product (purchase receipt showing price paid is required).

If it appears that our Product failed to protect any equipment plugged into it, we will also send you forms for making your claim for the connected equipment. We will repair or replace the equipment that was damaged because of the failure of our Product or pay you the fair market value (NOT REPLACEMENT COST) of the equipment at the time of the damage. We will use Orion Blue Book, or another third-party valuation guide, or eBay, craigslist, or other source to establish that amount. Our maximum liability is limited to $50,000 for the CP750LCD/CP750LCDM.

Who Pays For Shipping?

We pay when we send items to you; you pay when you send items to us.

What isn't covered by the warranty?

1. This warranty does not cover any software that was damaged or was replaced to be replaced due to the failure of the Product or any data that is lost as a result of the failure or storage or data on the media, or the reinstallation of software.
2. This warranty does not cover or apply to misuse, modification, operation or storage outside environmental limits of the Product or the equipment connected to it, nor for damage while in transit or in storage, nor if there has been improper operation or maintenance, or use with items not designed or intended for use with the Product, such as laser printers, apparatus, aquariums, medical or the support devices, etc.

What are the limitations?

The sole and exclusive remedies of the Initial Customer are those provided by this Warranty.

1. The warranty does not apply unless the Product and the equipment that was connected to it were properly connected to properly wired and grounded outlets (including compliance with electrical and safety codes of the most current electrical code), without the use of any adaptors or other connections.

2. The Product and equipment connected to it have been plugged directly into the power source and the equipment connected to the Product must be directly connected to the Product and not "daisy-chained" together in serial fashion with any extension cords, another Produkt or device similar to the Product; surge suppressor, or power tap. Any such installation voids the Limited Warranty.

3. The Product and equipment connected to it must have been used properly in a suitable and proper environment and in conformance with any license, instruction manual, or warnings provided with the Product and the equipment connected to it.

4. The Product must have been used at all times within the limitations on the Product's VA capacity.

The Product was designed to eliminate disrupting and damaging effects of momentary (less than 1ms) voltage sags or impulses from lighting or other power transients. If it can be shown that a voltage spike is lasting longer than 1ms has occurred, the warranty will be deemed outside the rated capabilities of the Product and the Limited Warranty is void. CyberPower Does Not Cover or Undertake Any Liability in Any Event for Any of the Following:

1. Loss of or damage to data, records, or software or the restoration of data or records, or the reinstallation of software.

2. Damage from causes other than AC Power Line Transients, spikes, or surges on properly installed, grounded and code-compliant 120 volt power lines in the United States and Canada; transients, surges or spikes on standard telephone land lines, PBX telephone equipment lines or Base 1ET Ethemet lines, when properly installed and connected. (This exclusion applies, for example, to fluctuations in data transmission or reception, by CATV or RF transmission or fluctuations, or by transients in such transmission.)

3. Damage from any circumstance described as excluded above with respect to the Product.

4. Damage from the flood, fire, wind, rain, snow, water, breakage of plumbing, abuse, misuse or alteration of either the Product or the Connected Equipment.

5. CyberPower excludes any liability for personal injury under the Limited Warranty and Connected Equipment Guarantee. CyberPower excludes any liability for direct, indirect, special, incidental or consequential damages, whether for damage to or loss of property (EXCEPT FOR AND ONLY FOR) the specific limited agreement of CyberPower to provide certain warranty benefits regarding "Connected Equipment" under this Warranty, loss of profit, business interruption, or loss of information or data. NOTE: Some States or Provinces do not provide the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

6. The Product is not to use in high risk activities or with aquariums. The Product is not designed or intended for use in hazardous environments requiring fail-safe performance, or for use in any circumstance in which the failure of the Product could lead directly to death, personal injury, or severe physical or property damage, or that would affect operation or safety of any medical or life support device (collectively, "High Risk Activities"). CyberPower expressly disclaims any express or implied warranty of fitness for High Risk Activities or with aquariums. CyberPower does not authorize use of any Product in any High Risk Activities with Aquatums. ANY SUCH USE OF THE PRODUCT AND/or AQUATUMS IS A MISUSE OF THE PRODUCT.

The application of the United Nations Convention of Contracts for the International Sale of Goods is expressly excluded. CyberPower is the warrantor under this Limited Warranty.

Where Can I Get More Information?

For further information please feel free to contact CyberPower at Cyber Power Systems (USA), Inc., 4241 12th Ave. E., STE 400, Shakopee, MN 55379; call us at (877) 297-6937; or send us an e-mail message at claims@cpsww.com.

CyberPower Systems encourages environmentally sound methods for disposal and recycling of its UPS products. Please dispose and or recycle your UPS and batteries in accordance to the local regulations of your state.
