

PPBE 3.2 Release Note

New Features

- Client supports to assign power connections for computer with Redundant Power Supplies.
- Center and Agent can calculate CO₂ emissions and energy cost periodically.
- Agent can record the energy consumption periodically and shows the total and average energy consumption.
- Agent has built-in SNMP Agent to communicate with Network Management Systems (NMS).

Features Improved

- Add Online Help in Quick Configuration Wizard.
- Disable Save File option when Hibernate is chosen as Shutdown type in Event Action settings.
- Make the help text easier to read in Installation Wizard.

Bugs Fixed

- Special characters are now supported for setting Host password in Agent/Client VA.
- Fix bugs of Email setting in Event Action page.
- Same group names are not allowed in Center.
- The name in Load Management of Agent cannot be blank now.
- There is a warning message showing battery self-test is invalid when UPS has no load.
- Client now can show CL/NCL Bank correctly when choosing UPS Outlet in Configuration page.
- Client will not get stuck in Negotiating when setting connections in Configuration page.
