

POWERPANEL® BUSINESS

Upgrade your UPS experience

PowerPanel Business® provides IT professionals with tools to shut down physical or virtual IT infrastructure during extended power outages or migrate Virtual Machines to unaffected systems. The FREE software easily monitors and manages CyberPower UPS systems and network connected PDUs.

**POWERPANEL®
BUSINESS**

SOFTWARE FEATURES:

- Automates shutdown sequence in response to power or UPS system events
- Supports physical and virtual infrastructure
- Monitors UPS vitals
- Logs events and power status recording
- Sends email notifications

LOCAL

Automates graceful shutdown of the computer connected to UPS through the USB/serial port during an unexpected extended power outage.

REMOTE

Automates the graceful shutdown of network-connected computers in the event of an extended power outage.

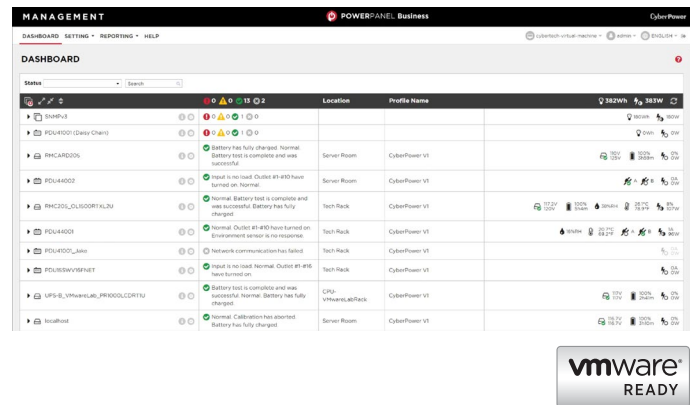

MANAGEMENT

Monitors CyberPower devices and host computers running PowerPanel® Business Local software on a local network.

THE INFORMATION YOU WANT

The interface you need

CyberPower has added support for VMware vSphere® Enterprise Edition™ to the PowerPanel® Business (PPB) platform. Used together with vCenter, PPB provides centralized control and visibility of virtualized environments and power conditions. With an out-of-the-box, configurable automated graceful shutdown sequence or triggering vMotion, PPB allows IT professionals to protect their virtual and physical environments from data loss or corruption.

POWER YOUR PLATFORM

PowerPanel® Business is available for the following operating systems:

PowerPanel® Business WINDOWS	PowerPanel® Business MAC OS	PowerPanel® Business LINUX	PowerPanel® Business VIRTUAL MACHINES
