POWERPANEL CLOUD
GATEWAY

INSTALL LOCALLY
MONITOR GLOBALLY

Easy cloud monitoring for non-cloud power devices

POWERPANEL CLOUD
GATEWAY
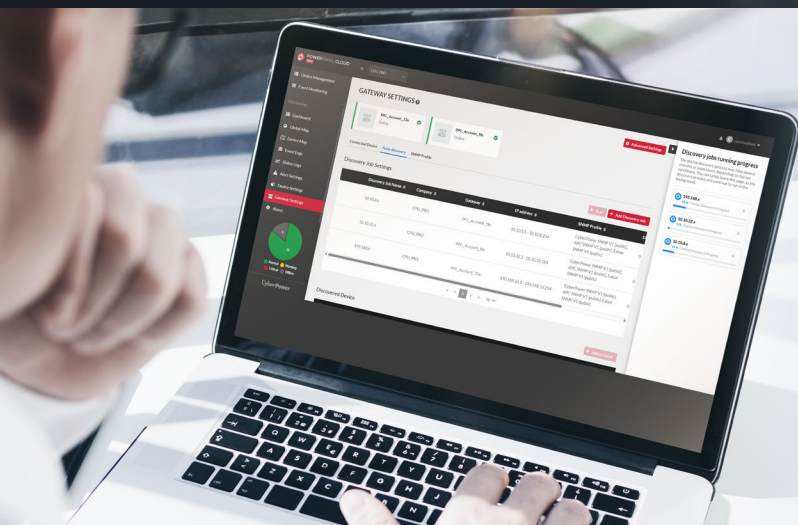

Easy cloud monitoring and management of devices connected via remote management network cards.
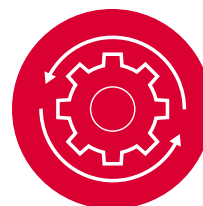

QUICK AND EASY SETUP

Once PowerPanel Cloud Gateway is installed, all management and configuration can be done from the cloud.

UNLIMITED DEVICES

Multiple instances may be connected to the user's PowerPanel Cloud account so they can monitor devices on multiple networks or in multiple locations.

AUTOMATIC UPDATES

With just a few clicks, users can configure preferences for PowerPanel Cloud Gateway to update automatically.

MONITOR POWER ANYTIME, ANYWHERE

## Easy cloud monitoring and management of non-cloud power devices

Ideal for decentralized, multi-user IT organizations, PowerPanel® Cloud Gateway provides the convenience of cloud management for power devices connected via SNMP protocol and remote management cards.

Monitor and receive power event
alerts in real-time

REAL-TIME MONITORING
No matter if they're across the hall or across the globe, monitor your PDU, ATS, and UPS systems in real time so issues can be addressed and resolved quickly.

INSTANT ALERTS
The intuitive, easy-to-use dashboard provides UPS status and power conditions at a glance, delivering timely alert notifications via email.

MANAGE SCANS AND UPDATES
Cloud-monitoring software enables easy discovery and integration of your SNMP-connected power devices.
