

CyberPower®

POWERPANEL® PERSONAL

UPGRADE YOUR UPS EXPERIENCE

PowerPanel® Personal enhances your UPS experience through an easy-to-use interface, notifications of power events, and configurable settings for shutdowns and restarts.

PowerPanel® Personal is **FREE** software that is controlled through a connection between your computer and a CyberPower UPS System via USB or serial communication port.

SOFTWARE FEATURES:

- **Status check** of your UPS at a glance, software configuration, and setup
- **Configurable settings** for managing automatic shutdowns, scheduled shutdowns, and restarts*
- **Email notifications** informing you of power events*
- **Reporting** that includes power consumption and equivalent CO2 emissions of connected equipment
- **Direct links** to our dedicated, US-based support team

*Feature not available on Linux operating systems

STAY PROTECTED

Protect important files by automatically triggering the operating system to shut down during an outage preventing loss or corruption.

STAY INFORMED

Configure the software to send you an email notification when a power event occurs.*

STAY ON BUDGET

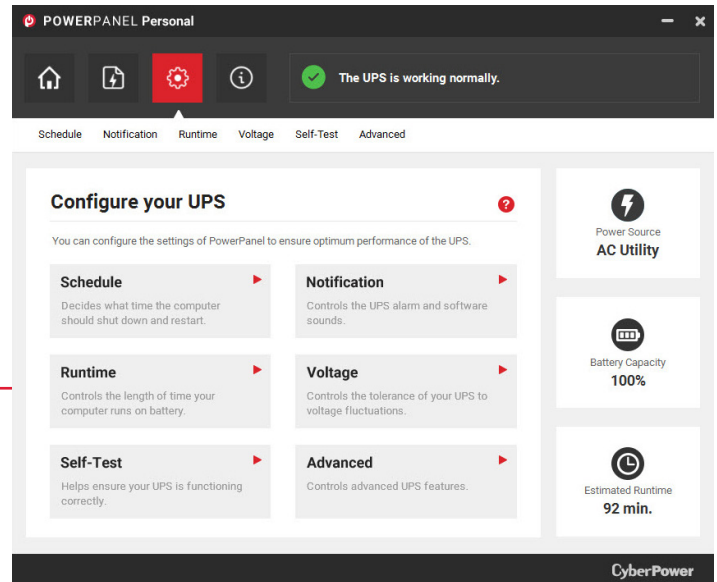

Monitor and track the power consumption of your UPS system and view a report to see the cost of powering devices.

*Feature not available on Linux operating systems

THE INFORMATION YOU WANT

THE INTERFACE YOU NEED

We designed PowerPanel® Personal for Windows and Mac operating systems to be an intuitive user experience allowing users to check the status of their UPS glance and easily configure software setup. The straightforward interface prominently displays electrical power supply, voltage, power condition, remaining battery capacity, battery status, remaining battery runtime, and UPS load through simple navigation.

POWER YOUR PLATFORM
